DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-5, 17-21 and 28-34, which are readable on Figures 5-6 in Paper No. 3 is acknowledged.
-

However, the claim 16 comprises one first swivel members and one second mating swivel member, which are shown in Figure 6 as reference numbers 70 and 72 respectively. Therefore, claim 16 is considered to be included in the applicant's election.

Claim Objections

2. Claim 1 is objected to because of the following informalities: there is lack of antecedent basis for "the top portion of the jack-o-lantern". Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Franks [US 2001/0036069].

Regarding claim 1, Franks discloses a suspended light source holder [5] having a light source holding portion [30] positioned within the interior of the jack-o-lantern [10], and a securing means [35] securing the suspended light source holder to the top portion [15] of the jack-o-lantern [10] (figures 1 and 7).

Regarding claim 2, Franks discloses a spacing means [20] (figures 1 and 7).

Regarding claim 3, Franks discloses the light source holding portion [30] being generally planar configuration (figure 1).

Regarding claim 4, Franks discloses a spacing means [20] being a rigid leg member, which has a leg upper end portion adjacent said securing means [35] and a leg lower end portion adjacent the light source holding portion [30] (figures 1 and 7).

Regarding claim 5, Franks discloses a securing means [35] having one barb member in substantially juxtaposed relation with the leg upper end portion of the rigid leg member [20] (figures 1 and 7, page 1 paragraph [0019]).

Allowable Subject Matter

5. Claims 16-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 16, the spacing means of the suspended light source holder comprises a first swivel member and a second mating swivel member.

Claims 17-21 and 28-34 are dependent on claim 16.

Claims 22-27, which have not been elected, are entitled to consideration of claims to allowance subject matter because they are dependent on claim 16.

The limitations discussed above are neither disclosed nor suggested by the prior art of record.
